Management of Unilateral Hearing Loss in Children: A Review of Current Literature

by Dave Gordey, Manager FM and Pediatrics, PhD Student

(Real time captioning will be provided) Systems Requirements: PC- Windows® 7, Vista, XP or 2003 Server, Mac®-Mac OS® X 10.6 or newer, Mobile- iPhone®, iPad®, Android™ phone or Android tablet

May 6, 2015, 12:00 p.m. E.S.T.

Adobe Connect Meeting. -Meeting Name: Management of Children with Unilateral Hearing Loss

Summary: This webinar will examine the literature, summarizing new developments and current perspectives in working with children who have unilateral hearing loss. Topics discussed will include information related to the cause of unilateral hearing loss, recommended follow up, and interventions with hearing technology. The learning objectives are to identify the primary causes of unilateral hearing loss in children, understand recommended management guidelines of children with unilateral hearing loss and understand protocol for selection and use of hearing technology for children with unilateral hearing loss.

Invited By: Kelly Lebel (kle@oticon.ca)

When: 05/06/2015 12:00 PM - 1:30 PM Time Zone: (GMT-05:00) Eastern Time (US and Canada)
